6. Click on "Download for MacOS"

- 7. Once downloaded, the file can be found and run from your downloads folder.
- 8. The VPN client, when active, is located in the task bar

9. When clicked, options for the VPN client are provided. Most important are "Connect" which will open the connection window. "Disconnect" which terminates VPN connection and continues to run the client app. And "Quit" which disconnects the VPN connection and shuts down the AnyConnect VPN Client. These options will change depending on your connection status.

- 10. If the VPN client does not automatically load, or if you have previously chosen to "Quit" the application:
 - a. Locate the "Cisco" folder under "Applications." Expand the folder and click on "Cisco AnyConnect Secure Mobility Client."
